

Aftab Khan

Data Scientist | Machine Learning Engineer | Data Analyst

+91 9309947358 | aftabakhan82@gmail.com | Vasai, Maharashtra | GitHub: github.com/aftabakhan82

Summary

Results-driven Data Scientist with hands-on experience in machine learning, predictive analytics, and computer vision. Skilled in building end-to-end ML pipelines including data preprocessing, feature engineering, model training, and deployment. Strong expertise in Python, SQL, and data visualization tools. Proven ability to improve model performance and deliver actionable insights for real-world business problems.

Technical Skills

- Languages:** Python, SQL
- ML/AI:** Scikit-learn, TensorFlow, Keras, XGBoost, CNN
- Data:** Pandas, NumPy, Feature Engineering, EDA, Data Pipelines
- Visualization:** Tableau, Power BI, Matplotlib, Seaborn
- Tools:** Git, GitHub, Flask, REST APIs
- Cloud:** AWS, GCP
- Databases:** MySQL, PostgreSQL, SQLite

Project Experience

- Built and deployed end-to-end machine learning pipelines improving prediction accuracy by up to 20%.
- Performed feature engineering and model tuning to optimize performance metrics such as ROC-AUC and F1-score.
- Developed dashboards for business insights improving decision-making efficiency.
- Integrated AI/ML models into applications using APIs and Flask backend.

Projects

Plant Disease Recognition

Python, CNN, TensorFlow, OpenCV

- Built CNN model achieving ~92% classification accuracy.
- Used transfer learning and augmentation to improve performance by 18%.
- Deployed via web interface for real-time predictions.

Customer Churn Prediction

Python, Scikit-learn, SQL

- Developed models achieving ROC-AUC of 0.87.
- Handled class imbalance improving recall by 25%.
- Compared multiple algorithms to select best-performing model.

StoryNest - AI Story Generator

Python, Flask, Generative AI

- Developed AI storytelling platform with personalized outputs.
- Implemented authentication and analytics system.
- Improved user engagement through AI-generated content.

FinSight AI - Financial Platform

Python, Flask, ML

- Built system for expense tracking and forecasting with anomaly detection.
- Automated categorization improving processing efficiency by 40%.
- Designed dashboards to visualize spending trends.

Education

- M.Sc. Data Science | Kes' Shroff College | 2024–2026
- B.Sc. Data Science | Viva College | 2021–2024

Certifications

- Tableau Certification

Soft Skills

- Analytical Thinking
- Problem Solving
- Communication
- Team Collaboration
